Standard Process products labeled as **Vegan** are devoid of animal-based tissue, animal-based gelatin, or fish oils. They are also devoid of animal-based ingredients such as dairy, eggs, honey, beeswax, and lanolin. Standard Process products labeled as **Gluten-Free** have been tested to verify they meet the regulations associated with the United States Food and Drug Administration's gluten-free labeling. Standard Process products labeled as **Non-Dairy** or **Non-Dairy Formula** have been formulated to not contain milk or milk-derived ingredients. Standard Process products labeled as **Non-Soy** or **Non-Soy Formula** have been formulated to not contain soy or soy-derived ingredients. Standard Process products labeled as **Non-Grain** or **Non-Grain Formula** have been formulated to not contain any true cereal grain or grain-derived ingredients such as those from wheat, rice, oats, cornmeal, barley, or another cereal grain. When you see our products labeled as **USDA Organic**, that means they have been certified as Organic by a USDA-accredited certifying agent.

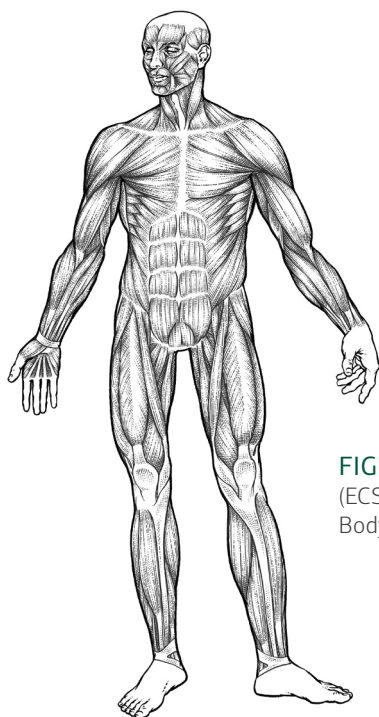

Hemp Oil and Hemp Oil Complex™

ENDOCANNABINOID SYSTEM SUPPORT

The Endocannabinoid System (ECS): An Important System for Whole Body Balance

The ECS is perhaps the most important physiological system involved in establishing and maintaining optimal health as it supports various functions in the body system. Found throughout the body organs, brain, connective tissues, glands, immune cells, and more, ECS supports the central nervous system, the immune system, hormones, bones, muscles and more. It's a bridge between body and mind that can aid in the response to physical and emotional stress.¹

- Central Nervous System
- Immune Response System
- Cardiovascular System
- Digestive System
- Hormones
- Muscles
- Bones
- Metabolism

FIGURE 1. The Endocannabinoid System (ECS): An Important System for Whole Body Balance

The ECS is comprised of components that include:

- Endocannabinoids: Lipid-derived signaling molecules produced by the human body that have activity similar to phytocannabinoids.
- Cannabinoid receptors: Both endo- and phytocannabinoids act on cannabinoid receptors (CB1/2) found throughout the body. They activate specific CB-receptors, which lead to a variety of physiologic processes via the cross-talk between cellular networks. This helps to maintain the systemic homeostasis that is governed by the ECS.^{2,3,4}
- Hydrolytic enzymes: Responsible for breaking down endocannabinoids.^{5,6}

Why choose Standard Process Hemp Supplements:

Grown on our Organic Farm

Our hemp is proudly grown on our certified organic farm[^], which helps preserve its exceptional quality From Seed to Supplement™. Our hemp comes from organic, non-GMO strains.

Exceptionally Clean Production Techniques

Our Supercritical Fluid Extraction process provides a full-spectrum extract by utilizing carbon dioxide (CO₂) instead of harsh solvents or chemical converting procedures.

Strict Quality Standards

Each batch of hemp oil is independently tested to ensure it lives up to our high expectations. The result is an ingredient that is pure, potent, and certified organic.

The **great majority** of the raw plant ingredients used in our products are grown on our certified organic farm

Freshly picked crops are often processed within a day to maintain vital nutrients

We harvest more than **6.5 million** pounds of ingredients on our certified organic and sustainable farm
