Dogs, cats, and horses have nutritional needs beyond what their regular diets provide. Their well-being deserves more than an annual wellness exam. It deserves Standard Process Veterinary Formulas™.

Since 1929, Standard Process has been the visionary leader in whole food nutrient solutions. Offered through qualified veterinary professionals, Standard Process Veterinary Formulas™ utilize the same state-of-the-art manufacturing processes and high-quality ingredients used to produce our human supplements. That’s because we believe what is good for us is also good for our pets.

Each pet’s unique needs change based on age, activity level, and health status. Standard Process Veterinary Formulas™ were created to fill these potential nutritional gaps. The goal of whole food-based supplementation is to provide nutrients for the body that are as close as possible to how they are found in nature. After all, it is in this whole food state that nutrition is typically harnessed and presented to the body.

The key to pets’ optimal health is a diet rich in a variety of complex nutrients. The ingredient combinations in Standard Process Veterinary Formulas™ provide a spectrum of nutrients to support multiple organs and systems in the body. Our complex, whole food-based veterinary formulas combine targeted nutrients sourced from plant ingredients, organ and glandular tissue, and specialized protein extracts.

Whether you’re looking for everyday wellness or targeted system support, we have a formula designed with every pet’s needs in mind.
CANINE FORMULAS OVERVIEW
Our canine formulas provide optimal nutritional support for the canine patient.

FELINE FORMULAS OVERVIEW
Our feline formulas meet the specific nutritional needs of the feline patient.

EQUINE FORMULAS OVERVIEW
Our equine formulas meet the specific nutritional needs of the equine patient.
COMMITMENT TO QUALITY

ORGANIC FARM
We are proud to be one of the few supplement manufacturers that can assure quality ingredients by growing many of our raw materials locally and organically. If we don’t grow it, we actively source the best-quality nutritional ingredients.

ENVIRONMENTALLY SAFE MANUFACTURING
Preserving the whole food complex is a top priority when manufacturing our supplements. We are committed to environmentally friendly manufacturing practices to help preserve the planet.

INNOVATION
Our Nutrition Innovation Center is the first of its kind, and it’s dedicated to researching new solutions in nutritional therapies.

QUALITY ASSURANCE
Our team of scientists includes chemists and microbiologists who test our product materials to ensure the purity and safety of our supplements.

HIGH-QUALITY INGREDIENTS
The great majority of raw plant ingredients are grown on our 868-acre certified organic farm. All raw animal tissues are obtained exclusively from U.S. Department of Agriculture (USDA)-inspected facilities.
How Standard Process Defines Whole Food Supplements

Quality frames our approach to making supplements — from our whole food philosophy and our careful ingredient sourcing, to our formulations and dedication to safety. “Quality from seed to supplement” is more than just a tag line to us. It’s a commitment we take to heart.

A whole food supplement is a complex formula of targeted ingredients that may include:

**Whole Food Ingredients**
Our product labels include many ingredients that you recognize as foods, and the great majority of the raw plant ingredients we use are grown on our certified organic farm. This allows us to control the quality of these ingredients from seed to supplement.

**Whole Food Concentrates**
Concentrates are used when a beneficial amount of nutrients cannot be delivered with a whole food ingredient. Fish oil is a good example. Derived from whole fish, the nonconcentrated triglyceride oil that makes up our final product allows patients to take advantage of the naturally occurring DHA and EPA omega-3 fatty acids.

**Whole Food Isolates**
Sometimes, foods do not contain sufficient quantities of specific nutrients to address certain health challenges. In this case, we use evidence-based food isolates to complement whole food ingredients. Isolates like glucosamine are used in our products because they are well-researched and have strong evidence for efficacy. Isolates can also be combined with other ingredients to maximize efficacy.

**Animal Tissue Extracts and Concentrates**
The use of specific animal tissue has a long history at Standard Process. The first product based on a Protomorphogen™ brand extract was introduced in 1952 and contained bovine heart PMG™ extract.

We start with glands and organs because they have more DNA per gram than skeletal muscle, have different protein profiles, and have different starting concentrations of vitamins and minerals. All raw animal tissues are exclusively sourced from U.S. Department of Agriculture (USDA)-inspected facilities.

**Protomorphogen™ Brand Extracts**
Continuing the pioneering work of Dr. Royal Lee, certain Standard Process products contain specific Protomorphogen™ brand extracts. Protomorphogen™ brand extracts are specific materials extracted from animal glands and organs through a complex process to retain what Dr. Lee termed “cellular determinants.” Current laboratory methods have confirmed that Protomorphogen™ brand extracts contain minerals, nucleotides (the components of nucleic acids like RNA and DNA), and peptides (short chains of amino acids).

**Cytosol™ Brand Extracts**
Cytosol™ brand extracts are derived from the cytoplasm of selected organs and glands through a process similar to the Protomorphogen™ extraction process. However, these extracts contain cellular factors, such as hormone precursors and synergistic cofactors, that are the biochemical building blocks essential to cellular metabolism.

**Whole Desiccates**
Whole desiccates are tissues that have been dried to provide the nutritional content of the organ in a concentrated form.

**Botanicals**
Botanicals provide important constituents that contribute additional support to the body’s systems. They complement the vitamins, minerals, and tissue concentrates found in whole food ingredients.

**Synthetic Ingredients**
Dr. Royal Lee included synthetics in his original formulas to meet label claims and/or enhance product effects. This type of ingredient has always been used selectively. Where synthetics appear, they have been added to protect the complexity and synergistic design of the formula.
Veterinary Formulas for Pets

Designed for both dogs and cats, these formulas contain a variety of whole food and other ingredients. These products are available in tablet or liquid form and can accommodate a range of body weights.

Please consult the actual product label for the most accurate product information. The synergistic products listed are for general reference only. Protocols should be devised by health care professionals according to each patient’s individual needs.
**VF ANTRONEX®** introduced in 2015

**A3010 - 90 Tablets**

When the body’s natural histamine response function kicks in, other systems are affected including the immune system and the liver. Building up defenses helps make sure these systems are working at optimal levels to support pet health.

VF Antronex® supports the liver and the body’s normal detoxification mechanisms.

**Indications for Use:**
- Clinical signs associated with liver challenges
- Patients in need of additional hepatic support
- Short- or long-term support for patients influenced by environmental, seasonal and other stresses

**Synergistic Product Support:**
- Canine Dermal Support
- Canine or Feline Immune System Support
- Canine or Feline Enteric Support

**VF BIO-DENT®** introduced in 2015

**A3000 - 90 Tablets**

Nutrition is a powerful tool to support pet oral health. VF Bio-Dent® contains calcium, phosphorus, and manganese for support of the bony structures and connective tissue in the body, including the mouth. The formula also contains complex food-based ingredients that provide support for endocrine and immune system health.

VF Bio-Dent®:
- Contains many of the building blocks needed to support and maintain oral health
- Provides systemic support for an overall healthy mouth, especially in an orally challenged animal
- Provides building blocks for young animals that are experiencing tooth and bone growth and development

**Indications for Use:**
- Support for normal growth and development of bone and the oral cavity
- Support for the health of oral tissues
- Support for the oral cavity, particularly in times of stress

**Synergistic Product Support:**
- Canine or Feline Immune System Support

---

**Ingredients:** Calcium lactate, bovine liver fat extract (yakriton), and d-alpha tocopherol (vitamin E sunflower). Other Ingredients: Calcium stearate and arabic gum.

**Guaranteed Analysis:**
- Calcium (min) 30 mg / tablet

**Dose Schedule:**
- All cats, dogs <20 lbs: 1 tablet 1x / day
- Dogs 20-50 lbs: 1 tablet 2x / day
- Dogs >51 lbs: 1 tablet 3x / day
- Or as directed by a veterinarian.

**How to Administer:** The tablets can be given whole or crushed and dosed directly or given with food.

**Servings per Container:**
90 based on 1 tablet per serving

---

**Ingredients:** Bovine bone, defatted wheat germ, calcium lactate, organic carrot, yeast bone, bovine adrenal, bovine spleen, ovine spleen, manganese glycerophosphate, organic sweet potato, licorice (root), and rice bran. Other Ingredients: Honey, cellulose, calcium stearate, and arabic gum.

**Guaranteed Analysis:**
- Calcium (min) 20 mg / tablet
- Phosphorus (min) 10 mg / tablet
- Manganese (min) 1.4 mg / tablet

**Dose Schedule:**
- All cats, dogs <20 lbs: 1 tablet 2x / day
- Dogs 20-50 lbs: 2 tablets 2x / day
- Dogs >51 lbs: 3 tablets 2x / day
- Or as directed by a veterinarian.

**How to Administer:** The tablets can be given whole or crushed and dosed directly or given with food.

**Servings per Container:**
90 based on 1 tablet per serving
VF HEMP OIL  Introduced in 2020

A3040 - 30 mL (1 fl oz)

VF Hemp Oil is a hemp oil for cats and dogs that provides plant-derived cannabinoids — known as phytocannabinoids — to support pets’ endocannabinoid systems (ECS).

- Formulated for dogs and cats
- Liquid form — convenient, flexible dosing with a graduated dropper
- 1 mL delivers 15 mg of phytocannabinoids, which support the endocannabinoid system
- Certified organic by MOSA

Caution: If animal’s condition worsens or does not improve, stop product administration and consult veterinarian. Safe use in pregnant animals or animals intended for breeding has not been proven. Administer during or after the animal has eaten to reduce incidence of gastrointestinal upset. For use in cats and dogs only.

Synergistic Product Support:
- Canine or Feline Whole Body Support
- Canine or Feline Immune System Support
- Canine Musculoskeletal Support or Canine Flex Support

VF OMEGA-3  Introduced in 2021

A3050 - 90 Softgels

VF Omega-3 is a fish oil supplement for dogs and cats formulated to provide omega-3 fatty acids that support pets’ critical body systems. It delivers concentrated fish oil in softgel form to bridge cats’ and dogs’ nutritional gap and help support:

- The pathways that regulate joint health
- Heart health
- Canine healthy skin and coat
- The central nervous system
- Brain development of puppies and kittens

Synergistic Product Support:
- Canine or Feline Whole Body Support
- Canine or Feline Cardiac Support
- Canine Musculoskeletal Support
- Canine Dermal Support

Measure omega-3 status with the Omega-3 Index for Pets Test (see page 35).

Directions for Use: Administer orally. Can be given during or after mealtime. Store in a cool, dark place.

Active Ingredient per 1 mL:
Organic Full Spectrum Hemp Extract 35 mg (contains 15 mg naturally occurring phytocannabinoids)

Inactive Ingredient: Organic extra virgin olive oil

Dose Schedule:

Or as directed by a veterinarian.

Ingredients: Fish oil concentrate (from anchovy and sardine), gelatin, water, glycerine, rosemary, and astaxanthin

Guaranteed Analysis:
EPA (min) 250 mg / softgel
DHA (min) 200 mg / softgel

Dose Schedule:

Cats and Dogs <10 lbs. Consult veterinarian
Cats and Dogs 10-20 lbs. 1 softgel / day
Dogs 21-40 lbs. 2 softgels / day
Dogs 41-60 lbs. 3 softgels / day
Dogs 61-80 lbs. 4 softgels / day
Dogs 81-100 lbs. 5 softgels / day
Dogs 101-120 lbs. 6 softgels / day

How to Administer: Softgel may be consumed whole or snipped and the oil applied directly on your pet’s food.

Servings per Container:
90 based on 1 softgel per serving

Please consult the actual product label for the most accurate product information. The synergistic products listed are for general reference only. Protocols should be devised by health care professionals according to each patient’s individual needs.

Standard Process Veterinary Formulas™ | 9
VF THYMEX® introduced in 2015

A3020 - 90 Tablets

Nutrition is a powerful tool to support pet immune system health. VF Thymex® supports a healthy thymus gland, the master gland of the immune system.

- Can be used in combination with other immune system support products
- Source of antioxidant vitamin C

Indications for Use:
- Patients in need of additional immune system support
- Patients in need of generalized trophic immune system support
- Patients with short-term or ongoing immune system challenges

Synergistic Product Support:
- Canine or Feline Immune System Support
- Canine or Feline Hepatic Support
- Canine or Feline Whole Body Support

Ingredients: Calcium lactate, bovine thymus Cytosol™ extract, magnesium citrate, and ascorbic acid.
Other Ingredients: Cellulose and calcium stearate.

Guaranteed Analysis:
Ascorbic Acid (Vitamin C) (min) 5 mg / tablet
*Not recognized as an essential nutrient by the AAFCO Dog or Cat Food Nutrient Profile.

Dose Schedule:
- All cats, dogs <20 lbs: 1 tablet 3x / day
- Dogs 20-50 lbs: 2 tablets 3x / day
- Dogs >51 lbs: 3 tablets 3x / day
- Or as directed by a veterinarian.

How to Administer: The tablets can be given whole or crushed and dosed directly or given with food.

Servings per Container:
90 based on 1 tablet per serving

Please consult the actual product label for the most accurate product information.
Canine Formulas

Since dogs are omnivores, the canine formulas contain a variety of ingredients, including a balance of animal tissues and botanical materials. These ingredient combinations provide a spectrum of nutrients to support multiple organs. Most of the canine formulas are powdered to accommodate the range of body weights in the canine population.
CANINE ADRENAL SUPPORT  Introduced in 2002

A1100 - 0.9 oz (25 g)  |  A1150 - 3.5 oz (100 g)

The adrenal glands help the body adapt to stress through the release of corticosteroids and hormones. With chronic stress, the adrenals can become fatigued, affecting many body systems, including the pituitary and thyroid glands, autonomic nervous system, liver, duodenum, and kidneys.

Canine Adrenal Support is formulated to:
• Help adrenal glands respond normally to stress and metabolic demands
• Support the glands’ ability to rebuild and regenerate
• Provide vital nutritional support to related organs

Indications for Use:
• Sudden stressful event or ongoing stress (internal or external)
• Signs of fatigue, reduced stamina, glucose intolerance, inflammatory response, and inadequate immune system functioning
• Clinical signs associated with adrenal stress

Synergistic Product Support:
• Canine Whole Body Support
• Canine Hepatic Support

Ingredients: Bovine liver, bovine adrenal PMG™ extract, black currant juice, organic alfalfa (aerial parts) juice powder, porcine duodenum, defatted wheat germ, eleuthero (Eleutherococcus senticosus), nutritional yeast, organic carrot, wheat germ oil, organic shilajit mushroom powder, organic reishi mushroom powder, veal bone PMG™ extract, bovine adrenal Cytothin™ extract, organic pea vine juice powder, rice bran, bovine adrenal, bovine kidney, organic buckwheat (aerial parts) juice powder, organic buckwheat flour, sea salt, oat flour, bovine orchic extract, bovine pituitary PMG™ extract, sunflower lecithin, fat solubile extract from alfalfa (leaf) and sunflower seed, kelp, and manganese glycophosphates.

Dose Schedule: Based on body weight, the patient should receive the formula according to the following recommendations, or as otherwise directed.

How to Administer: The powder can be mixed with or poured over the dog’s food, mixed with water and administered by oral syringe, or made into a paste and given directly.

Servings per Container:
• A1100: 65 based on ⅛ teaspoon
• A1150: 65 based on ⅛ teaspoon
A ⅛ teaspoon scoop is included with the small canine powder bottles, and a ⅛ teaspoon scoop is included with the large canine powder bottles.

CANINE CARDIAC SUPPORT  Introduced in 2002

A1200 - 0.9 oz (25 g)  |  A1250 - 3.5 oz (100 g)

The heart is at the center of the cardiovascular system, which is a complex, coordinated group of organs and tissues. Nutritional support for the cardiovascular system also includes the other organs that support the heart, such as the liver, kidneys, and digestive system.

Canine Cardiac Support provides nutrients that:
• Support optimal cardiac function
• Support normal function of muscle cells

Indications for Use:
• General cardiac support
• Patients with increased cardiac demand or conditions that increase cardiac workload

Synergistic Product Support:
• Canine Renal Support
• Canine Adrenal Support
• Canine Whole Body Support

Ingredients: L-carnitine, bovine liver, bovine heart PMG™ extract, rice bran, bovine kidney, bovine orchic extract, organic beet (root), defatted wheat germ, bovine spleen, ovine spleen, selenium yeast, riboflavin acid, wheat germ oil, bovine pancreas Cytothin™ extract, veal bone PMG™ extract, organic buckwheat (aerial parts) juice powder, organic buckwheat flour, organic alfalfa (aerial parts) juice powder, calcium lactate, hawthorn (berry), organic carrot, organic shilajit mushroom powder, organic reishi mushroom powder, nutritional yeast, organic pea vine juice powder, Spanish moss (Tillandsia usneoides), oat flour, fat solubile extract from alfalfa (leaf) and sunflower seed, inositol, choline bitartrate, porcine brain, and ascorbic acid.

Guaranteed Analysis:
• Calcium (min): 0.3 mg/ ⅛ tsp. or 1 mg/⅛ tsp.
• Sodium (max): 3 mg/ ⅛ tsp. or 12 mg/⅛ tsp.
• Selenium (min): 4 mcg/ ⅛ tsp. or 16 mcg/⅛ tsp.

Dose Schedule: Based on body weight, the patient should receive the formula according to the following recommendations, or as otherwise directed.

How to Administer: The powder can be mixed with or poured over the dog’s food, mixed with water and administered by oral syringe, or made into a paste and given directly.

Servings per Container:
• A1200: 60 based on ⅛ teaspoon
• A1250: 70 based on ⅛ teaspoon
A ⅛ teaspoon scoop is included with the small canine powder bottles, and a ⅛ teaspoon scoop is included with the large canine powder bottles.
Nutrition plays a major role in skin health. Healthy skin is a result of a well-functioning, synchronized effort by tissues and organs in the body.

Canine Dermal Support contains whole food ingredients to help:
- Maintain proper liver, adrenal, immune, and intestinal function
- Support and maintain the skin’s ability to withstand the effects of environmental exposures

**Indications for Use:**
- General skin health
- General digestive system health, adrenal gland health, or immune system health

**Synergistic Product Support:**
- Canine Enteric Support
- Canine Adrenal Support
- Canine Hepatic Support
- Canine Whole Body Support

**Ingredients:** Bovine liver, L-glutamine, New Zealand green mussel (Perna canalicula) (shellfish), milk thistle extract (80% silymarine), bovine kidney, defatted wheat germ, organic alfalfa (aerial parts) juice powder, amla extract, fat soluble extract from alfalfa (leaf) and sunflower seed, bovine adrenal PMG™ extract, bovine liver fat extract, bovine spleen, ovine spleen, calcium lactate, maltodextrin, organic extra virgin olive oil, organic carrot, bovine liver PMG™ extract, nutritional yeast, porcine jejunum, organic SP beet blend (organic Swiss chard juice powder, organic beet (root), organic beet (leaf) juice powder), black currant juice, porcine stomach, betaine hydrochloride, bovine parotid PMG™ extract, organic shiitake mushroom powder, organic reishi mushroom powder, oat flour, porcine brain, bovine adrenal Cytoox™ extract, dandelion (root) (Taraxacum officinale), inositol, purified bovine bile salts, bovine bone, organic buckwheat (aerial parts), Spanish moss (Tillandsia usneoides), and organic pea vine.

**Guaranteed Analysis:**
- Zinc (min) 14 mcg / ½ tsp. or 58 mcg / ½ tsp.

**Dose Schedule:** Based on body weight, the patient should receive the formula according to the following recommendations, or as otherwise directed.

<table>
<thead>
<tr>

</tbody>
</table>

**How to Administer:** The powder can be mixed with or poured over the dog’s food, mixed with water and administered by oral syringe, or made into a paste and given directly.

**Servings per Container:**
- A1300 65 based on ½ teaspoon
- A1350 75 based on ½ teaspoon

A ½ teaspoon scoop is included with the small canine powder bottles, and a ⅛ teaspoon scoop is included with the large canine powder bottles.

Please consult the actual product label for the most accurate product information. The synergistic products listed are for general reference only. Protocols should be devised by health care professionals according to each patient’s individual needs.
CANINE ENTERIC SUPPORT  Introduced in 2002
A1400 - 1.1 oz (30 g)  |  A1450 - 3.9 oz (110 g)

A healthy digestive tract is critical to overall health and well-being. In addition to breakdown and absorption of nutrients, digestive health can also have a significant impact on other body systems (immune system, liver, bone marrow, or adrenal glands). This product contains a variety of functional foods, both plant and animal, that “feed” the various components of the digestive system to:

- Provide general digestive system support
- Support the ability of intestinal cells to function, regenerate, and respond to daily metabolic and immune challenges

Indications for Use:
- General enteric support
- Patients with increased metabolic demand
- Hepatic patients in need of additional enteric support

Synergistic Product Support:
- Canine Immune System Support
- Canine Hepatic Support
- Canine Whole Body Support

Ingredients: Porcine stomach, L-glutamine, porcine duodenum, porcine jejunum, defatted wheat germ, bovine liver, veal bone PMG™ extract, organic alfalfa (aerial parts) juice powder, bovine parotid PMG™ extract, bovine kidney, nutritional yeast, bovine liver PMG™ extract, bovine spleen, ovine spleen, bovine adrenal PMG™ extract, organic pea vine juice powder, bovine pancreas Cytoesel™ extract, organic carrot, oat flour, organic shiitake mushroom powder, organic reishi mushroom powder, bovine orchic extract, rice bran, bovine pancreas PMG™ extract, Spanish moss (Tillandsia unalised), organic SP beet blend (organic Swiss chard juice powder, organic beet (root), organic beet (leaf) juice powder), licorice (root), wheat germ oil, purified bovine bile salts, fat soluble extract from alfalfa (leaf) and sunflower seed, bovine parathyroid, bovine pituitary PMG™ extract, and calcium glycerophosphate.

Guaranteed Analysis:
- Phosphorus (min) 1 mg / 1/2 tsp. or 5 mg / 1 tsp.
- Sodium (max) 4 mg / 1/2 tsp. or 12 mg / 1 tsp.
- Riboflavin (min) 7 mcg / 1/2 tsp. or 30 mcg / 1 tsp.
- Niacin (min) 50 mcg / 1/2 tsp. or 0.2 mg / 1 tsp.

Dose Schedule: Based on body weight, the patient should receive the formula according to the following recommendations, or as otherwise directed.

1-10 lbs 1/2 teaspoon 1x / day
11-20 lbs 1/2 teaspoon 2x / day
21-40 lbs 1/2 teaspoon 2x / day
41-60 lbs 1/2 teaspoon 2x / day
61-80 lbs 1/2 teaspoon 2x / day
>80 lbs 1 teaspoon 2x / day

How to Administer: The powder can be mixed with or poured over the dog’s food, mixed with water and administered by oral syringe, or made into a paste and given directly.

Servings per Container:
A1400 75 based on 1/2 teaspoon
A1450 70 based on 1/2 teaspoon

A 1/2 teaspoon scoop is included with the small canine powder bottles, and a 1 teaspoon scoop is included with the large canine powder bottles.

CANINE FLEX SUPPORT  Introduced in 2011
A1480 - 100 Wafers

Wear and tear of joints and surrounding tissues, especially in very active and aging dogs, can cause stiffness and trigger the body’s normal inflammatory response function. Canine Flex Support helps maintain healthy joint function, including support for the cartilage.

It provides nutrients that:
- Moderate the body’s normal inflammatory response
- Provide potent antioxidants
- Support healthy immune modulation

Indications for Use:
- Maintenance: especially for large breeds, performance dogs, and growing puppies
- Short- or long-term support for any dog with joint challenges, especially for active or aging dogs

Synergistic Product Support:
- Canine Musculoskeletal Support

Ingredients: Ginger (root), honey, bovine liver, calcium stearate, and turmeric (root) powder.

Guaranteed Analysis:
- Vitamin E (min) 5 IU / wafer
- Ascorbic Acid (Vitamin C*) (min) 5 mg / wafer
- Chondroitin (as chondroitin sulfate)* (min) 110 mg / wafer
- Glucosamine Sulfate (from shellfish)* (min) 250 mg / wafer

*Not recognized as an essential nutrient by the AAFCO Dog Food Nutrient Profile.

Dose Schedule: Based on body weight, the patient should receive the formula according to the following recommendations, or as otherwise directed.

1-25 lbs 1 wafer 1x / day
26-50 lbs 2 wafers 1x / day
51-80 lbs 3 wafers 1x / day
>80 lbs 4 wafers 1x / day

How to Administer: The wafer can be given as a treat or crushed and mixed with the dog’s food.

Servings per Container:
A1480 100 based on 1 wafer per serving
CANINE HEMP OIL COMPLEX™ introduced in 2018

A3030 - 60 Softgels

Canine Hemp Oil Complex™ is a unique formulation of ingredients, combined to provide a 3-in-1 benefit for a dog’s whole body – supporting the endocannabinoid system, inflammation response resolution pathways, and endogenous antioxidant pathways.

- Supports the endocannabinoid system
- Supports the body’s natural inflammatory response function
- Ingredients that provide antioxidant activity
- Non-genetically engineered hemp
- Combination of natural omega-3 fatty acids, including DHA, DPA and EPA
- Calamari oil certified sustainable from the independent nonprofit group Friend of the Sea*

Caution: If animal’s condition worsens or does not improve, stop product administration and consult your veterinarian. Safe use in pregnant animals or animals intended for breeding has not been proven. Administer during or after the animal has eaten to reduce incidence of gastrointestinal upset.

We also offer VF Hemp Oil which is suitable for both dogs and cats (see page 9).

Active Ingredients per Softgel

Inactive Ingredients: Beeswax, dimagnesium malate, gelatin, glycerine, organic extra virgin olive oil, and water.

Dose Schedule: For use in dogs only. To support endocannabinoid system. Administer orally. Can be given during or after mealtime.

| Servings per Container: | A3030 60 based on 1 softgel per serving |

Warnings: Not for human consumption. Keep out of the reach of children and animals. In case of accidental overdose, contact a health professional immediately.
CANINE HEPATIC SUPPORT

A1500 - 1.1 oz (30 g) | A1550 - 3.9 oz (110 g)

The liver is a complex organ that interacts with most organs in the body, including the intestinal tract, cardiovascular system, kidneys, and autonomic nervous system. Nutritional support for the liver must address these interactions to be effective.

This product is formulated to support:
- Liver metabolism
- Hepatic circulation
- Bile production and flow
- Hepatic immune function

Indications for Use:
- General hepatic support
- Patients with increased metabolic demand

Synergistic Product Support:
- Canine Renal Support
- Canine Enteric Support

Ingredients:
Bovine liver PMG™ extract, bovine kidney, porcine duodenum, porcine stomach, veal bone PMG™ extract, porcine jejunum, wheat germ oil, defatted wheat germ, organic alfalfa (aerial parts) juice powder, bovine heart PMG™ extract, bovine liver, bovine orich extract, riboflavin, bovine spleen, ovine spleen, organic SP beet blend (organic swiss chard juice powder, organic beet (root), organic beet (leaf) juice powder), calcium lactate, organic reishi mushroom powder, organic shiitake mushroom powder, ginkgo biloba (whole leaf), nutritional yeast, rice bran, black currant seed oil, dandelion (root) Taraxacum officinale), milk thistle extract (80% silymarin), oat flour, bovine liver fat extract, New Zealand green mussel (Hemidiscus cupulatus) shellfish), calcium glyceroxophosphate, L-glutamine, selenium yeast, zinc amino acid (rice) chelate, organic Brussels sprouts (aerial parts), organic buckwheat (aerial parts) juice powder, organic buckwheat flour, pericline brain, bovine pituitary PMG™ extract, Spanish moss (Tillandsia usneoides), betaine hydrochloride, magnesium lactate, fat soluble extract from alfalfa (leaf) and sunflower seed, choline bitartrate, inositol, and ascorbic acid.

Guaranteed Analysis:
Calcium (min) 0.6 mg / ½ tsp. or 2.5 mg / ½ tsp.
Magnesium (min) 200 mg / ½ tsp. or 800 mg / ½ tsp.

Dose Schedule: Based on body weight, the patient should receive the formula according to the following recommendations, or as otherwise directed.

How to Administer: The powder can be mixed with or poured over the dog’s food, mixed with water and administered by oral syringe, or made into a paste and given directly.

Servings per Container:
A1500 70 based on 1/8 teaspoon
A1550 75 based on 1/2 teaspoon

A 1/2 teaspoon scoop is included with the small canine powder bottles, and a 1 teaspoon scoop is included with the large canine powder bottles.
CANINE IMMUNE SYSTEM SUPPORT

A1600 - 1.1 oz (30 g) | A1650 - 3.9 oz (110 g)

The immune system is a complex array of cells that are found throughout the body. Immune cells are designed to work in conjunction with other cells to provide a defense against unwanted invaders. The complexity of the immune system requires a multidimensional approach of nutritional factors. The nutritional support of the immune system is directed at facilitating normal function and is not intended to be suppressive or stimulating.

- Provides nutritional and biochemical support for healthy immune cells and tissues
- Supports optimal immune system function

Indications for Use:
- General immune system support
- Colder climates or during the fall/winter months
- When kenneled or in a shelter

Synergistic Product Support:
- VF Thymex®
- Canine Hepatic Support
- Canine Enteric Support
- Canine Whole Body Support

Ingredients: Bovine liver, nutritional yeast, rice bran, bovine spleen PMS™ extract, bovine thymus PMS™ extract, organic carrot, bovine kidney, bovine thymus Cytoisol™ extract, bovine pancreas Cytoisol™ extract, bovine spleen, ovine spleen, organic pea vine juice powder, eleuthero (Eleutherococcus senticosus), organic buckwheat (aerial parts) juice powder, organic buckwheat flour, porcine duodenum, porcine jejunum, bovine adrenal Cytoisol™ extract, real bone PMS™ extract, defatted wheat germ, oat flour, calcium lactate, purified bovine bile salts, maltodextrin, black currant juice, organic Spanish black radish (root), ribenuclic acid, bovine adrenal PMS™ extract, organic reishi mushroom powder, organic shiitake mushroom powder, ashwagandha (Withania somnifera), Spanish moss (Tillandsia usneoides), zinc amino acid (rice) chelate, kelp, and black currant (seeds) oil.

Guaranteed Analysis:
- Calcium (min) 0.6 mg / ½ tsp, or 2.5 mg / ½ tsp
- Sodium (max) 6 mg / ½ tsp, or 25 mg / ½ tsp
- Magnesium (min) 175 mg / ½ tsp, or 700 mg / ½ tsp
- Zinc (min) 120 mg / ½ tsp, or 480 mg / ½ tsp

Dose Schedule: Based on body weight, the patient should receive the formula according to the following recommendations, or as otherwise directed.

1-10 lbs ½ teaspoon 1x / day
11-20 lbs ½ teaspoon 2x / day
21-40 lbs ½ teaspoon 2x / day
41-60 lbs ½ teaspoon 2x / day
61-80 lbs ¾ teaspoon 2x / day
>80 lbs 1 teaspoon 2x / day

How to Administer: The powder can be mixed with or poured over the dog’s food, mixed with water and administered by oral syringe, or made into a paste and given directly.

Servings per Container:
A1600 75 based on ½ teaspoon
A1650 75 based on ½ teaspoon

A ½ teaspoon scoop is included with the small canine powder bottles, and a ⅜ teaspoon scoop is included with the large canine powder bottles.

Please consult the actual product label for the most accurate product information. The synergistic products listed are for general reference only. Protocols should be devised by health care professionals according to each patient’s individual needs.
CANINE MUSCULOSKELETAL SUPPORT

A1700 - 0.7 oz (20 g)  |  A1750 - 3.2 oz (90 g)

The canine musculoskeletal system has many components: bones, joints, muscles, tendons, ligaments, nerves, blood vessels, and organs that support these tissues, including the liver, kidneys, and adrenal glands.

- Supports optimal musculoskeletal function
- Provides a wide range of essential nutrients
- Helps maintain optimal health and function

Indications for Use:
- General growth support
- Performance/working animals
- Senior animals

Synergistic Product Support:
- Canine Hepatic Support
- Canine Whole Body Support
- Canine Flex Support

<table>

A ¼ teaspoon scoop is included with the small canine powder bottles, and a ½ teaspoon scoop is included with the large canine powder bottles.

Please consult the actual product label for the most accurate product information.
For renal challenges, not only should the kidneys be supported but consideration should also be given to support of the liver, cardiovascular system, and autonomic nervous system.

- Provides support for the normal function of the kidneys
- Supports the liver, cardiovascular system, and nervous system

Indications for Use:
- Patients in need of renal support
- Hepatic patients in need of additional renal support

Synergistic Product Support:
- Canine Hepatic Support
- Canine Cardiac Support
- Canine Whole Body Support

**Ingredients:** Bovine kidney, organic kidney bean (aerial parts) juice powder, oat flour, bovine liver, ribonucleic acid, veal bone, nutritional yeast, bovine oesophagogastric juice extract, organic beef (root), organic pea vine juice powder, organic buckwheat (aerial parts) juice powder, organic buckwheat flour, organic alfalfa (aerial parts) juice powder, bovine kidney PMG™ extract, bovine spleen, ovine spleen, rice bran, bovine thyroid PMG™ extract (processed to substantially remove its thyroxine), organic carrot, black currant seed oil, wheat germ oil, organic shiitake mushroom powder, organic reishi mushroom powder, kelp, bovine adrenal, black currant juice, maltodextrin, enzymatically processed Spanish moss (Tillandsia usneoides) and beet (root), bovine pituitary PMG™ extract, fat soluble extract from alfalfa (leaf) and sunflower seed, manganese glycophosphate, and organic beet (leaf) juice powder.

**Guaranteed Analysis:**
- Sodium (max) 5 mg / ½ tsp. or 60 mg / ½ tsp.
- Chloride (min) 2.5 mg / ½ tsp. or 10 mg / ½ tsp.

**Dose Schedule:** Based on body weight, the patient should receive the formula according to the following recommendations, or as otherwise directed.

CANINE THYROID SUPPORT  Introduced in 2002

A1900 - 0.9 oz (25 g)  |  A1950 - 3.5 oz (100 g)

The endocrine system has an interesting web of interactions with different organs in the body, and the thyroid gland plays a major role.

• Provides critical trace mineral support for the thyroid gland
• Supports glands and tissues that interact with the thyroid, including the adrenals and liver
• Supports all aspects of thyroid function

Indications for Use:
• General thyroid support
• Patients with increased metabolic demand

Synergistic Product Support:
• Canine Whole Body Support
• Canine Hepatic Support

Ingredients: Eleuthero (Eleutherococcus senticosus), bovine liver, bovine orchic extract, bovine adrenal, bovine thyroid PMG™ extract (processed to substantially remove its thyroxine), New Zealand green mussel (Perna canaliculus) shellfish, Spanish moss (Tillandsia usneoides), calcium lactate, bovine adrenal PMG™ extract, sunflower lecithin, porcine ovary (Cystoll™) extract, organic shiitake mushroom powder, organic reishi mushroom powder, organic buckwheat (aerial parts) juice powder, organic buckwheat flour, kelp, wheat germ oil, bovine bone, rice bran, organic pea wine juice powder, defatted wheat germ, organic alfalfa (aerial parts) juice powder, bovine heart PMG™ extract, ribonucleic acid, porcine duodenum, oat flour, porcine brain, calcium glycerophosphate, and ascorbic acid.

Guaranteed Analysis:
Calcium (min) 2 mg / ¼ tsp. or 8 mg / ½ tsp.
Phosphorus (min) 1.25 mg / ¼ tsp. or 5 mg / ½ tsp.
Sodium (max) 6 mg / ¼ tsp. or 25 mg / ½ tsp.

Dose Schedule: Based on body weight, the patient should receive the formula according to the following recommendations, or as otherwise directed.

How to Administer: The powder can be mixed with or poured over the dog's food, mixed with water and administered by oral syringe, or made into a paste and given directly.

Servings per Container:
A1900   65 based on ¼ teaspoon
A1950   80 based on ½ teaspoon

A ¼ teaspoon scoop is included with the small canine powder bottles, and a ½ teaspoon scoop is included with the large canine powder bottles.
Supplements made from whole foods, organ and tissue extracts, botanicals, and other ingredients can fill nutrition gaps.

- Provides general multisystem support for daily maintenance of all body systems, with emphasis on a healthy endocrine system
- Is an excellent nutritional foundation for use with all other system-support formulas

**Indications for Use:**
- Daily supplement for any patient
- Growing animals
- Performance/working animals
- Endocrine system support
- Senior animals

**Synergistic Product Support:**
- Canine Hepatic Support
- Canine Immune System Support
- Canine Renal Support
- Canine Cardiac Support
- Canine Enteric Support

**Ingredients:** Defatted wheat germ, bovine liver, organic pea vine juice powder, nutritional yeast, rice bran, organic carrot, organic alfalfa (aerial parts) juice powder, milk thistle extract (80% silymarins), organic beet (root), porcine stomach, oat flour, bovine heart PMG™ extract, Spanish moss (Tillandsia usneoides), L-carnitine, organic Brussels sprouts (aerial parts), bovine orchic Cytoisol™ extract, bovine spleen, ovine spleen, kidney bean (aerial parts) juice powder, kelp, bovine liver PMG™ extract, bovine trabecia, bovine bone, bovine kidney PMG™ extract, bovine kidney, choline bitartrate, inositol, thiamin hydrochloride, bovine adrenal Cytoisol™ extract, celery (aerial parts), bovine liver fat extract,veal bone, organic shiitake mushroom powder, organic reishi mushroom powder, calcium lactate, bovine adrenal PMG™ extract, copper amino acid (rice) chelate, porcine hypothalamus Cytoisol™ extract, iron amino acid (rice) chelate, manganese glyceroxophosphate, bovine pituitary PMG™ extract, bovine thymus PMG™ extract, carnitine, zinc amino acid (rice) chelate, porcine hypothalamus PMG™ extract, sunflower lecithin, bovine thymus Cytoisol™ extract, pericline brain, and ascorbic acid.

**Guaranteed Analysis:**
- Calcium (min) 1.25 mg / ½ tsp or 5 mg / ⅛ tsp.
- Sodium (max) 3.5 mg / ½ tsp or 14 mg / ⅛ tsp.
- Iron (min) 125 mcg / ½ tsp or 500 mcg / ⅛ tsp.
- Copper (min) 50 mcg / ⅛ tsp or 200 mcg / ⅛ tsp.
- Manganese (min) 150 mcg / ½ tsp or 600 mcg / ⅛ tsp.
- Zinc (min) 75 mcg / ⅛ tsp or 300 mcg / ⅛ tsp.

**Dose Schedule:** Based on body weight, the patient should receive the formula according to the following recommendations, or as otherwise directed.

**How to Administer:** The powder can be mixed with or poured over the dog’s food, mixed with water and administered by oral syringe, or made into a paste and given directly.

**Servings per Container:**
- A2000 65 based on ½ teaspoon
- A2050 70 based on ½ teaspoon

A ⅛ teaspoon scoop is included with the small canine powder bottles, and a ½ teaspoon scoop is included with the large canine powder bottles.
Feline Formulas

Since cats are obligate carnivores, the feline formulas contain fewer ingredients than the canine formulas and focus more on animal tissues. These ingredient combinations provide a wide range of nutrients to support multiple organs. The feline formulas are in tablet form to allow for several administration options.
**FELINE CARDIAC SUPPORT**  Introduced in 2002

AS005 - 90 Tablets

The heart is at the center of the cardiovascular system, which is a complex, coordinated group of organs and tissues. Nutritional support for the cardiovascular system also includes the organs that support the heart, such as the liver, kidneys, and digestive system.

- Provides nutrients that support optimal cardiac function
- Supports normal function of muscle cells

**Indications for Use:**
- General cardiac support
- Patients with increased cardiac demand or conditions that increase cardiac workload

**Synergistic Product Support:**
- Feline Renal Support
- Feline Hepatic Support
- Feline Whole Body Support

**Ingredients:**
- Bovine heart PMG™ extract, bovine orichic Cytosoil™ extract, bovine adrenal, bovine liver, Spanish moss (Tillandsia usneoides), organic alfalfa (aerial parts) juice powder, L-carnitine, bovine kidney, bovine spleen, ovine spleen, amla extract, rice bran, organic buckwheat (aerial parts) juice powder, organic buckwheat flour, organic pea vine juice powder, nutritional yeast, bovine adrenal Cytosoil™ extract, hawthorn (berry), kelp, ribonucleic acid, kelp, wheat germ oil, oat flour, and bone meal.
- Other Ingredients: Honey, maltodextrin, and calcium stearate.

**Guaranteed Analysis:**
- Calcium (min): 1 mg / tablet
- Potassium (min): 5 mg / tablet
- Sodium (max): 3 mg / tablet
- Manganese (min): 3.5 mg / tablet

**How to Administer:**
- The feline patient should receive one tablet two times per day, or as directed. Feline formulas can be administered in a variety of ways, including:
  - Whole tablet or crushed
  - Dosed directly or mixed with food
  - Cautiously, as a powder suspended in water given by oral syringe
- To familiarize the cat with the supplement, it may be helpful to place one tablet beside the food bowl for two or three days prior to mixing the tablet with the food.

**Servings per Container:**
- 90 based on 1 tablet per serving

---

**FELINE ENTERIC SUPPORT**  Introduced in 2002

AS105 - 90 Tablets

A healthy digestive tract is critical to overall health and well-being. In addition to affecting breakdown and absorption of nutrients, the digestive health of an animal can also have a significant impact on other body systems (immune system, liver, bone marrow, or adrenal glands).

This product contains a variety of functional foods, both plant and animal, that “feed” the various components of the digestive system to:

- Provide general digestive system support
- Support the ability of intestinal cells to function, regenerate, and respond to daily metabolic and immune challenges

**Indications for Use:**
- General enteric support
- Patients with increased metabolic demand
- Hepatic patients in need of additional enteric support

**Synergistic Product Support:**
- Feline Immune System Support
- Feline Hepatic Support
- Feline Whole Body Support

**Ingredients:**
- Porcine jejunum, bovine liver, porcine stomach, L-glutamine, porcine duodenum, bovine spleen, ovine spleen, defatted wheat germ, rice bran, nutritional yeast, bovine kidney, organic alfalfa (aerial parts) juice powder, New Zealand green mussel (Perna canaliculus) (shellfish), whale bone PMG™ extract, and fat soluble extract from alfalfa (leaf) and sunflower seed.
- Other Ingredients: Honey and calcium stearate.

**Guaranteed Analysis:**
- Manganese (min): 3.5 mg / tablet

**How to Administer:**
- The feline patient should receive one tablet two times per day, or as directed. Feline formulas can be administered in a variety of ways, including:
  - Whole tablet or crushed
  - Dosed directly or mixed with food
  - Cautiously, as a powder suspended in water given by oral syringe
- To familiarize the cat with the supplement, it may be helpful to place one tablet beside the food bowl for two or three days prior to mixing the tablet with the food.

**Servings per Container:**
- 90 based on 1 tablet per serving

---

Please consult the actual product label for the most accurate product information. The synergistic products listed are for general reference only. Protocols should be devised by health care professionals according to each patient’s individual needs.
FELINE HEPATIC SUPPORT

AS205 - 90 Tablets

The liver is a complex organ that interacts with most organs in the body, including the intestinal tract, cardiovascular system, kidneys, and autonomic nervous system. Nutritional support for the liver must address these interactions to be effective. This product is formulated to support:

- Liver metabolism
- Hepatic circulation, bile production and flow
- Hepatic immune function

**Indications for Use:**
- General hepatic support
- Patients with increased metabolic demand

**Synergistic Product Support:**
- Feline Renal Support
- Feline Enteric Support
- Feline Whole Body Support

**Ingredients:**
- Bovine liver PMG™ extract, bovine liver, bovine kidney, bovine spleen, ovine spleen, L-glutamine, porcine stomach, amla extract, bovine bone, organic pea vine juice powder, porcine duodenum, New Zealand green mussel (Perna canaliculus) (shellfish), organic buckwheat (aerial parts) juice powder, organic buckwheat flour, defatted wheat germ, oat flour, bovine kidney PMG™ extract, nutritional yeast, bovine liver fat extract (yakriton), bovine adrenal, organic SP beet blend (organic swiss chard juice powder, organic beet (root), organic beet (leaf) juice powder, milk thistle extract (80% silymarin), choline bitartrate, inositol, organic alfalfa (aerial parts) juice powder, rice bran, enzymatically processed Spanish moss (Tillandsia usneoides) and beet (root), copper amino acid (rice) chelate, iron amino acid (rice) chelate, and zinc amino acid (rice) chelate.

**Guaranteed Analysis:**
- Sodium (max) 7 mg / tablet
- Chloride (min) 7 mg / tablet
- Iron (min) 150 mcg / tablet
- Copper (min) 15 mcg / tablet
- Zinc (min) 21 mcg / tablet

**How to Administer:** The feline patient should receive one tablet two times per day, or as directed. Feline formulas can be administered in a variety of ways, including:
- Whole tablet or crushed
- Dosed directly or mixed with food
- Cautiously, as a powder suspended in water given by oral syringes

To familiarize the cat with the supplement, it may be helpful to place one tablet beside the food bowl for two or three days prior to mixing the tablet with the food.

**Servings per Container:**
- 90 tablets based on 1 tablet per serving

FELINE IMMUNE SYSTEM SUPPORT

AS305 - 90 Tablets

The immune system is a complex array of cells that are found throughout the body. Immune cells are designed to work in conjunction with each other to provide a defense against unwanted invaders. The complexity of the immune system requires a multidimensional approach to nutritional factors. Nutritional support of the immune system is directed at facilitating normal function and is not intended to be suppressive or stimulating.

- Provides nutritional and biochemical support for healthy immune cells and tissues
- Supports optimal immune system function

**Indications for Use:**
- General immune system support
- Colder climates or during the fall/winter months
- When kenneled or in a shelter

**Synergistic Product Support:**
- VF Thymex®
- Feline Whole Body Support
- Feline Enteric Support

**Ingredients:**
- Eleutherine (Eleutherococcus senticosus), bovine liver, L-glutamine, porcine jejunum, bovine orchic CytoS™ extract, ribonucleic acid, alma extract, bovine spleen PMG™ extract, bovine thymus CytoS™ extract, bovine pituitary PMG™ extract, bovine spleen, ovine spleen, porcine hypothalamus CytoS™ extract, organic buckwheat (aerial parts) juice powder, organic buckwheat flour, bovine kidney, oat flour, organic alfalfa (aerial parts) juice powder, copper amino acid (rice) chelate, iron amino acid (rice) chelate, zinc amino acid (rice) chelate, kelp, and bovine pancreas PMG™ extract.

**Guaranteed Analysis:**
- Potassium (min) 3.5 mg / tablet
- Iron (min) 140 mcg / tablet
- Copper (min) 20 mcg / tablet
- Zinc (min) 70 mcg / tablet

**How to Administer:** The feline patient should receive one tablet two times per day, or as directed. Feline formulas can be administered in a variety of ways, including:
- Whole tablet or crushed
- Dosed directly or mixed with food
- Cautiously, as a powder suspended in water given by oral syringes

To familiarize the cat with the supplement, it may be helpful to place one tablet beside the food bowl for two or three days prior to mixing the tablet with the food.

**Servings per Container:**
- 90 tablets based on 1 tablet per serving

Please consult the actual product label for the most accurate product information.
FELINE RENAL SUPPORT  
Introduced in 2002

A5405 - 90 Tablets

For renal challenges, not only should the kidneys be supported but consideration should also be given to support of the liver, cardiovascular system, and autonomic nervous system.

- Facilitates support and natural rehabilitation of the kidneys
- Provides balanced cellular nutrition for all aspects of urinary system function

Indications for Use:
- Patients in need of renal support
- Hepatic patients in need of additional renal support

Synergistic Product Support:
- Feline Hepatic Support
- Feline Cardiac Support
- Feline Whole Body Support

Ingredients:
- Bovine kidney PMG™ extract, bovine kidney, bovine liver, real bone PMG™ extract, bovine bone, defatted wheat germ, organic buckwheat (aerial parts) juice powder, organic buckwheat flour, bovine spleen, ovine spleen, organic alfalfa (aerial parts) juice powder, organic pea vine juice powder, oat flour, bovine adrenal Cytosol™ extract, amla extract, ribonucleic acid, organic kidney bean (aerial parts) juice powder, bovine heart PMG™ extract, New Zealand green mussel (Perna canaliculus) (shellfish), Spanish moss (Tillandsia usneoides), rice bran, enzymatically processed Spanish moss (Tillandsia usneoides and beet (root), organic SP beet blend (organic swiss chard) juice powder, organic beet (root), organic beet (leaf) juice powder, and porcine duodenum.

Other Ingredients: Honey and calcium stearate.

Guaranteed Analysis:
- Calcium (min) 3.5 mg / tablet
- Phosphorus (min) 2.4 mg / tablet
- Sodium (max) 15 mg / tablet

How to Administer: The feline patient should receive one tablet every two times per day, or as directed. Feline formulas can be administered in a variety of ways, including:
- Whole tablet or crushed
- Dosed directly or mixed with food
- Cautiously, as a powder suspended in water given by oral syringe

To familiarize the cat with the supplement, it may be helpful to place one tablet beside the food bowl for two or three days prior to mixing the tablet with the food.

Servings per Container:
- 90 based on 1 tablet per serving

FELINE WHOLE BODY SUPPORT  
Introduced in 2002

A5505 - 90 Tablets

Supplements made with whole food ingredients, organ and tissue extracts, botanicals, and other ingredients can fill nutrition gaps.

- Provides general multisystem support for daily maintenance of all body systems with emphasis on a healthy endocrine system
- Is an excellent nutritional foundation for use with all other system-support formulas

Indications for Use:
- Daily supplement for any patient
- Growing animals
- Active animals
- Endocrine system support
- Senior animals

Synergistic Product Support:
- Feline Hepatic Support
- Feline Enteric Support
- Feline Renal Support
- Feline Cardiac Support
- Feline Immune System Support
- VF Hemp Oil

Ingredients:
- Bovine liver, organic alfalfa (aerial parts) juice powder, bovine liver PMG™ extract, bovine trachea, bovine bone, bovine heart PMG™ extract, bovine spleen, ovine spleen, L-glutamine, rice bran, porcine jejunum, amla extract, bovine kidney PMG™ extract, bovine kidney, oat flour, bovine adrenal Cytosol™ extract, nutritional yeast, organic pea vine juice powder, organic SP beet blend (organic swiss chard) juice powder, organic beet (root), organic beet (leaf) juice powder, organic buckwheat (aerial parts) juice powder, organic buckwheat flour, bovine orchic Cytosol™ extract, chromium yeast, New Zealand green mussel (Perna canaliculus) (shellfish), zinc amino acid (rice) chelate, L-carnitine, kidney bean (aerial parts) juice powder, defatted wheat germ, inositol, choline bitartrate, enzymatically processed Spanish moss (Tillandsia usneoides) and beet (root).

Other Ingredients: Honey, maltodextrin, and calcium stearate.

Guaranteed Analysis:
- Zinc (min) 5 mg / tablet
- Calcium (min) 180 mg / tablet

How to Administer: The feline patient should receive one tablet two times per day, or as directed. Feline formulas can be administered in a variety of ways, including:
- Whole tablet or crushed
- Dosed directly or mixed with food
- Cautiously, as a powder suspended in water given by oral syringe

To familiarize the cat with the supplement, it may be helpful to place one tablet beside the food bowl for two or three days prior to mixing the tablet with the food.

Servings per Container:
- 90 based on 1 tablet per serving
Equine Formulas

The equine formulas contain ingredients derived from vegetables, herbs, and fruits to deliver a full spectrum of phytonutrients, enzymes, minerals, and vitamins in their most potent form. Safe and effective, these formulas were developed to target the nutritional demands of specific systems. The equine formulas are in powder form and do not contain any animal tissues. Each formula can be used for either short- or long-term support.

FEEDING TIPS

- Start slowly by mixing a small amount of powder into the feed.
- Add the powder to the feed and dampen with water. (Spray bottles can be helpful.) Shake the container to mix the powder with the feed. This will also prevent the powder from settling in the bottom of the feeding container.
- Mix with unsweetened applesauce and add to the horse’s feed or syringe directly into the horse’s mouth.
- Add to a mash made of commonly found low-starch pelleted feeds or soaked hay cubes.
EQUINE GI SUPPORT  Introduced in 2011

E7700 - 30 ounces (850 g)

The equine gastrointestinal (GI) tract is an extensive set of organs that must efficiently function together to support adequate nutrition for the horse to maintain a cooperative working attitude and pleasant disposition. Horses experiencing a challenge to the GI tract may or may not display a perceivable change in behavior, eating patterns, or performance.

This product contains a variety of whole food and other ingredients that may support:

- Liver and GI tract detoxification pathways
- Lining of the intestinal wall
- Healthy bacterial populations in the hindgut
- Oxidation processes

Indications for Use:
- Horses in training
- Horses with limited access to pasture
- Horses experiencing a change in routine
- Horses that travel
- Horses with limited turnout

Key Ingredients: Brussels sprouts, kale, chamomile†, inulin, L-glutamine, and vitamin E

Caution: For equine use only. Keep out of reach of children.

†This ingredient could be considered a controlled substance by certain entities that govern equine competitions. We advise those who feed any supplement to competing horses to check with the governing body specific to the event regarding whether the product contains ingredients that could be considered a controlled substance.

Ingredients: Whey protein (milk), flax meal, L-glutamine, inulin (chicory root fiber), rice protein, organic Brussels sprouts (whole plant), organic kale (aerial parts), calcium citrate, magnesium citrate, organic buckwheat (aerial parts), chamomile extract, inositol, alfalfa (aerial parts) juice powder, d-alpha tocopherol (vitamin E sunflower), modified tapioca starch, sunflower lecithin powder, choline bitartrate, grape seed extract, organic carrot, and red wine extract.

Serving Size: ¼ cup (30 g)
Servings per Container: 28
Suggested Use: ¼ cup (30 g) per 1,000 lb. horse per day, or as directed.
EQUINE IMMUNE SUPPORT

E7800 - 30 ounces (850 g)

Training, competition, travel, environmental factors, and lack of turnout combined with age, diet, and stress level may present challenges to the immune system in any season. Some horses may react to those challenges by exhibiting subtle or not-so-subtle changes in behavior, depending on the temperament, personality, and or management of the animal. This product encourages and supports the innate and adaptive immune response that is necessary for the health, performance, and stamina of the horse.

The product includes an array of ingredients derived from functional foods that may support:

- Immune-cell signaling
- Antioxidant activities
- Cell integrity

Indications for Use:
- Horses with limited turnout
- Horses under bouts of stress
- Horses enduring environmental changes
- Traveling horses
- Horses experiencing a change in routine

Key Ingredients: L-glutamine, turmeric, mushrooms, vitamin A palmitate, vitamin D, and yeast cultures† (*Saccharomyces boulardii*)

Caution: For equine use only. Keep out of reach of children.

†This ingredient could be considered a controlled substance by certain entities that govern equine competitions. We advise those who feed any supplement to competing horses to check with the governing body specific to the event regarding whether the product contains ingredients that could be considered a controlled substance.
The realities of modern equine management may result in challenges to the metabolic processes of the horse. Identifying early signs of these challenges and responding with management suggestions and nutritional support is critical for the overall health of the horse.

This product includes a variety of whole food and other ingredients that may promote healthy metabolic processes of the horse by:

- Promoting healthy glucose metabolism
- Supporting healthy insulin function
- Providing plant-based ingredients that may promote antioxidant activity

**Indications for Use:**
- Horses struggling with excess weight or fat deposits, especially on the rump or neck
- Horses who exhibit seasonal pasture sensitivities
- Horses struggling with changing insulin levels

**Key Ingredients:** Licorice root, cinnamon, cayenne (chili powder), buckwheat flour, green tea extract, chromium, and vanadium.

**Caution:** For equine use only. Keep out of reach of children.

†This ingredient could be considered a controlled substance by certain entities that govern equine competitions. We advise those who feed any supplement to competing horses to check with the governing body specific to the event regarding whether the product contains ingredients that could be considered a controlled substance.
EQUINE MOBILITY SUPPORT

E8000 - 40 ounces (1,134 g)

Equine joints inevitably suffer stress during daily riding, training, and competing and are expected to deteriorate as a result of the natural aging process. Horses are the longest-lived domesticated animal, with a potential life span of 40 years. Friction and load-bearing stress on a horse’s joints over time may affect comfort and performance, sometimes even before the signs are apparent.

This product is a unique blend of whole foods and other ingredients that may help both the performance and retired horse by:

• Promoting healthy joint function, flexibility, and mobility
• Supplying antioxidants
• Supporting a healthy inflammatory response

Indications for Use:
• Horses in regular training
• Horses on rest due to a mobility challenge
• Geriatric or retired horses

Key Ingredients: Glucosamine sulfate, chondroitin sulfate, wheat germ oil, flax meal, ginger†

Caution: For equine use only. Keep out of reach of children.

†This ingredient could be considered a controlled substance by certain entities that govern equine competitions. We advise those who feed any supplement to competing horses to check with the governing body specific to the event regarding whether the product contains ingredients that could be considered a controlled substance.
Equine Performance is a supplement for horses that may help in training, traveling, or competition by providing important energy & immune response substrates. Horses that train rigorously, travel, or compete may experience an inflammatory response, exercise-related muscle soreness, and oxidative stress. Diet, level and amount of exercise, age, and the nature of a training program are all factors that may play a role in maintaining a balance between oxidative stress and antioxidant status in the performance horse.1 Oxidative stress may be the result of decreased antioxidant activity, increased amounts of reactive oxygen species, or both.2 Horses in training may experience a physiological challenge and as a result will attempt to regain homeostasis through coordination of multiple organ systems.3 Dietary antioxidants may help the horse cope with rigorous athletic demands.4

This product is a unique blend of whole foods and other ingredients that may help horses in training, traveling, or competition by:

- Providing important energy and immune response substrates
- Supporting energy pathways
- Offering antioxidant support
- Providing ingredients that may support recovery from strenuous activity

**Indications for Use:**
- Horses preparing for, participating in, or recovering from competition
- Horses preparing for, participating in, or recovering from travel
- Horses in demanding or rigorous training programs

**Key Ingredients:** Glutamate, L-glutamine, selenium yeast (contains 550 micrograms organically bound selenium), ribonucleic acid, tart cherry

**Caution:** For equine use only. Keep out of reach of children.

---

**Ingredients:** Whey protein (milk), flax meal, L-glutamine, glutamic acid, nutritional yeast, rice protein, tart cherry powder, ribonucleic acid, calcium citrate, magnesium citrate, selenium yeast, organic buckwheat (aerial parts), organic Brussels sprouts (aerial parts), organic kale (aerial parts), choline bitartrate, inositol, alfalfa (aerial parts) juice powder, sunflower lecithin powder, grape seed extract, organic carrot, and red wine extract.

**Serving Size:** ¼ cup (30 g)

**Servings per Container:** 28

**Suggested Use:** ¼ cup (30 g) per 1,000 lb. horse per day, or as directed.

---

Kits: Get Off on the Right Paw

For young dogs and cats, the early days are a critical development time. Delivering essential nutrition during this influential stage can have a big impact on patient outcomes. The Puppy Pack and Kitten Kit are easy, effective ways to distinguish your offerings, improve satisfaction, and help pet parents support the newest member of the family.
The key to optimal health is a diet rich in a variety of complex nutrients, and young dogs have nutritional needs beyond what their regular diets may provide. The Puppy Pack is intended to introduce dogs to the wonderful differences that proper nutrition can make.

Included in the Puppy Pack is:

• 1 – Small Canine Whole Body Support (see page 21)
• 1 – Small Canine Immune System Support (see page 17)
• 1 – Puppy Pack Parent Brochure
• 1 – Collapsible Water Bowl
The key to optimal health is a diet rich in a variety of complex nutrients, and young cats have nutritional needs beyond what their regular diets may provide. The Kitten Kit is intended to introduce cats to the wonderful differences that proper nutrition can make.

Included in the Kitten Kit is:

- 1 – Feline Whole Body Support (see page 25)
- 1 – Feline Immune System Support (see page 24)
- 1 – Kitten Kit Parent Brochure
- 1 – Beet Catnip Toy
The Omega-3 Index for Pets Test is a blood test for dogs that measures the amount of omega-3 fatty acids (EPA and DHA) in red blood cells. The test is important for measuring omega-3 fats in the body to help maintain healthy fat levels — an important indicator of overall health.

- Measure: You won’t know if your patient’s balance of fats is optimal unless they’re measured.
- Modify: A low omega-3 index can be improved by increasing omega-3 intake.
- Monitor: Track how your patient’s dietary changes affect their blood levels by testing regularly.

Once you know the omega-3 index, you can supplement your patient’s diet to modify it in as little as 3–4 months.

This test is currently available for dogs and should only be administered by a veterinary professional.

**Synergistic Product Support:**

**Glossary**

**Acid maltase:** An enzyme that breaks down carbohydrates. Breaks off individual glucose molecules from the maltose units. In combination with amylase and glucoamylase these enzymes complete the breakdown of starch and other carbohydrates.

**Alfalfa (Medicago sativa):** A perennial flowering legume.

**Alginic acid:** An organic acid from various algae species.

**Antioxidants:** Substances found in food, especially fruits and vegetables.

**Arabic gum:** A natural gum from the acacia tree; used as a colloidal stabilizer to make tablets.

**Barley:** Barley grass used in our formulas consists of the green leaves of the barley plant as opposed to the grain.

**Beet root:** The underground portion of a beet plant.

**Beet leaves:** The above-ground portion of a beet plant; also known as Swiss chard.

**Beta carotene:** The yellow pigment found in many yellow and orange fruits, such as carrots.

**Betaine:** A sweet, crystalline, quaternary ammonium salt (boswellia) (Boswellia serrata): A moderate- to large-sized branching tree of the family Burseraceae, traditionally used to support a healthy inflammatory response.

**Bovine:** Cow.

**Bovine bile salts:** A purified source of bovine bile salts in a powdered form.

**Broccoli:** A member of the cabbage family, broccoli is a cruciferous vegetable.

**Bromelain:** A protein-digesting and milk-clotting enzyme generally found in pineapple fruit juice and stem tissue.

**Brussels sprout:** A brassica related to broccoli and cabbage.

**Buckwheat:** A member of the Polygonaceae family buckwheat comes in a variety of colors, from white to gold, rich red, and deep green.

**Calcium glycerophosphate:** A white crystalline powder that is soluble in cold water.

**Calcium lactate:** A source of calcium (not derived from a dairy product or source).

**Calcium stearate:** A plant-based stearic acid used for lubrication in the manufacture of products.

**Carbamide powder:** A food-grade urea.

**Carthamus tinctorius (safflower):** A plant appearing to have a supportive effect on the cardiovascular system.

**Celery:** A member of the Apiaceae or Umbelliferae family it comes in a variety of colors, from white to gold, rich red, and deep green.

**Chelated iron:** Provides an excellent source of iron.

**Chlorella pyrenoidosa:** A green, single-celled alga.

**Chromium yeast:** An excellent source of chromium.

**Copper chelate:** Provides an excellent source of copper.

**Defatted wheat germ:** Wheat germ is noted for its dense nutritional content of the vitamin B complex and many important trace minerals essential for the full physiological activity of the associated vitamin complexes.

**Disodium phosphate:** A calcium compound used in calcium therapy.

**Eleutherococcus senticosus (eleuthero):** Several species of this plant grow around the world, and though some are preferred for specific benefits, all are considered to have similar properties as an effective general rejuvenator.

**Emblica officinalis (Indian gooseberry):** An herb that has traditionally been used for the purposes of enhancing general vitality and cognition as well as promoting longevity.

**Flax meal:** Contains significant levels of omega-3 fatty acids, specifically alpha-linoleic acid (ALA).

**Ginger:** A thickened pungent aromatic rhizome that contains a broad spectrum of bioactive compounds.

**Ginkgo biloba:** Made from leaves and seeds of the ginkgo tree, Ginkgo biloba has a long history of use in traditional Chinese medicine.
**Glucosamine sulfate**: A naturally occurring chemical harvested from the shells of shellfish.

**Inositol**: A component of the B-vitamin complex. Inositol acts as an important catalyst in energy reactions that involve the metabolizing of some fats and carbohydrates.

**Inulin**: A complex carbohydrate and soluble fiber. It is beneficial to the gut microflora and supports calcium and magnesium absorption. Inulin is found naturally in many common plants, especially chicory.

**Iron chelate**: Provides an excellent source of iron. Iron is an important nutrient essential for a wide range of vital biological processes, including the synthesis of hemoglobin, and is also involved in the entire process of respiration, including oxygen and electron transport.

**Kale**: A green leafy cruciferous plant that belongs to the Brassica genus, which includes cabbage, collards, and Brussels sprouts.

**Kelp**: Brown seaweed of the genus Laminaria that is a good source of trace minerals.

**Kidney bean (Phaseolus vulgaris)**: An annual legume.

**L-carnitine**: Carnitine is required for transporting long-chain fatty acids into the cells, which is essential for the conversion of fatty acids into energy for the cells, especially in heart muscle. (See the Primary Ingredient Cross Reference for products listed under Heart PMG™ Extract, Bovine; Liver PMG™ Extract, Bovine; and Liver Powder, Bovine.)

**L-glutamine**: An amino acid used to make other amino acids, glucose, and glutathione. Used for energy by immune and intestinal cells.

**Lutein**: A type of phytochemical with antioxidant activity known as carotenoid (or natural pigment). Lutein is found in dark green leafy vegetables, such as kale.

**Magnesium lactate**: A source of magnesium.

**Manganese glycerophosphate**: A source of manganese, an essential trace mineral important for skeletal and cartilage formation.

**Manganese lactate**: A manganese salt derived from lactic acid that is a source of manganese. Manganese acts as a cofactor and catalyst in many enzymatic processes.

**Micronutrients**: Essential nutritional elements required in very small or trace amounts for the body to function properly. Examples include iron, copper, manganese, and zinc.

**Milk thistle (Silybum marianum)**: An annual or biennial plant of the Asteraceae family, its scientific name is Silybum marianum.

**Mixed tocopherols**: The antioxidant component of the vitamin E complex.

**Mushroom**: Available in many varieties and has a long history of use in traditional Chinese medicine.

**Nutritional yeast**: Inactive yeast with high protein and B-vitamin content.

**Oats**: A hardy cereal grain, common oats are known scientifically as Avena sativa.

**Ovine**: Sheep.

**Pea vine**: An annual leguminous vine.

**Pea vine juice**: The extracted juice from the pea vine.

**Phytomutrient**: Biologically active nutrients found in plants that give them their color and taste. Also referred to as phytochemicals, they are known to have health-promoting properties.

**Porcine**: Pork.

**Protomorphogen™ extract**: In the 1940s, Dr. Royal Lee pioneered a unique method of deriving extracts that contain what he called cell determinants from specific organs and glands for clinical use. He believed that these cell determinants functioned in cell regulation, maintenance, and interaction with tissue antibodies. It is clear both from the description of the extraction process and clinical use that these extracts differ from what is commonly referred to as “glandulars.” Furthermore, because these extracts have a distinct clinical application and effect, they should not be confused with glandulars, nor should they be referred to simply as “protomorphogens.” Rather, “Protomorphogen™” is the trademark used by Standard Process Inc. as a brand name assigned to these uniquely derived extracts. “PMG™” is another trademark used by Standard Process Inc. as another brand name for these extracts.

**Rhizopus oryzae**: A mold grown on Tillandsia usneoides and beet root as a source of enzymes.

**Ribonucleic acid**: Nucleic acid occurring in cell cytoplasm and the nucleolus, first isolated in plants but later found in animal cells.

**Selenium yeast**: A rich source of selenium. Selenium is an essential trace element that has antioxidant activity mediated through its role in the formation and function of selenium-dependent glutathione peroxidases. Also believed to help maintain a healthy heart and joints.

**Silybum marianum (milk thistle)**: This species is an annual or biennial plant of the Asteraceae family.

**Soybean lecithin**: A rich source of lecithin, a precursor to choline. A substance that is crucial for proper central nervous system, liver, cardiovascular, and immune system health. A rich source of phospholipids.

**Spanish black radish**: An excellent source of sulfur, which protects against free radicals and is also beneficial in the healthy functioning of the GI tract.

**Sunflower lecithin**: A type of phospholipid found in sunflower seeds.

**Taraxacum officinale (dandelion)**: A flowering herbaceous perennial plant of the family Asteraceae.
**Tart cherry**: A fleshy stone fruit known for its antioxidant properties.

**Thiamine (vitamin B1)**: A water-soluble vitamin that works with the other B vitamins to change protein, carbohydrates, and fat to energy.

**Tillandsia usneoides (Spanish moss)**: A plant belonging to the pineapple family and grown in the southeastern coastal plain of the United States. Spanish moss is a nonparasitic plant that is supported by another plant and has aerial roots exposed to the humid atmosphere.

**Turmeric**: An Indian perennial herb of the ginger family.

**Vanadium**: A grayish metallic element found combined in minerals.

**Wheat germ oil**: One of the richest sources of the complete vitamin E complex. Vitamin E is beneficial in multiple metabolic processes.

**Whey protein**: Whey (milk) protein is the protein and amino acid components extracted from whey. Whey is the clear liquid left after the protein of milk has been clotted and most of the fat removed, e.g., after cheese production.

**Whole desiccate**: The whole, dried glandular tissue. It contains proteins of the entire organ or gland in a concentrated form.

**Withania somnifera (ashwagandha, Indian ginseng)**: Part of the Solanaceae family, this plant’s tuberous roots have therapeutic uses.

**Yakriton**: A liver fat extract.

**Zinc chelate**: Contains zinc that is bound to rice protein to maintain healthy zinc level.

### Common Name Reference

**Common Name**: Botanical Name

- *Boswellia*: *Boswellia serrata*
- *Burdock*: *Arctium lappa*
- *Cayenne pepper*: *Capsicum annuum*
- *Dandelion*: *Taraxacum officinale*
- *Echinacea*: *Echinacea angustifolia*
- *Echinacea*: *Echinacea purpurea*
- *Filamentous fungi*: *Rhizopus oryzae*
- *Ginkgo*: *Ginkgo biloba*
- *Globe artichoke*: *Cynara scolymus*
- *Gotu kola*: *Centella asiatica*
- *Juniper berry*: *Juniperus communis*
- *Maitake mushroom*: *Grifola frondosa*
- *Milk thistle*: *Silybum marianum*
- *Nettle*: *Urtica dioica*
- *Oregon grape*: *Berberis aquifolium*
- *Pygeum*: *Pygeum africanum*
- *Red clover*: *Trifolium pratense*
- *Saw palmetto*: *Serenoa repens*
- *Spanish moss*: *Tillandsia usneoides*
- *Turkey tail mushroom*: *Coriolus versicolor*
FAQs

The most commonly asked questions about Standard Process and our products:

Why would a product look different from bottle to bottle? Because of the variability in sources of natural and organic ingredients, color, texture, and odor may vary from batch to batch. However, the basic formula remains constant, and product testing ensures quality.

Why are honey, arabic gum, cellulose, and calcium stearate added to products? Honey and arabic gum are used as binders in our tablet manufacturing process. Cellulose is used to give body to the powders. Calcium stearate, derived from vegetable sources, is used as a lubricant to help products release from the tablet machines. We do not use artificial flavoring or coloring.

Is your calcium stearate derived from hydrogenated oils? Is it safe for consumption? The calcium stearate we use is derived from palm oil, which is a saturated fat, like cocoa butter, dairy fats, etc. Calcium stearate is approved by the FDA to be used as a lubricant and is approved for use in food products.

Why is sucrose listed on your labels? The sucrose found in our products comes from natural sources such as sugar cane. Sucrose, along with starch and arabic gum, is used to coat vitamin A and vitamin D (cholecalciferol), making them into a powdered form that helps prevent oxidation of these vitamins. The amount of sucrose in the actual product is very minimal.

Why is it better to take supplements throughout the day instead of all at once? The body processes most compounds based on concentration; so the more there is, the faster the body works to process it. The key is getting the right concentration at the right time. In general, taking smaller amounts throughout the day allows the body to maintain a lower but more consistent amount for a longer period of time, sustaining the molecular mechanisms supported by the consumed compounds.

What does the ‘Best By’ date mean? Please refer to the “Best By” date on all product boxes and bottles to determine how long a product maintains optimal quality and/or flavor. Standard Process only guarantees product potency through the “Best By” date.

What do I need to consider when recommending a combination of products? Standard Process products are thought to work synergistically and support multiple aspects of health. In some cases, combined products can result in very high levels of certain vitamins or minerals. Where warranted, guidance is provided for individual products on the label and in this catalog via warnings and cautions.
How to Read Product Labels

Below is an example of the different parts of our label and what they refer to.

1. Product name
2. Product description
3. Product number
4. Product size
5. Serving size
6. Servings per container
7. Ingredients: ingredients that contribute to the label claims; listed from "most to least" based on formula
8. Guaranteed Analysis: order mandated by the FDA
9. Dose Schedule: recommended product dosage based on body weight
10. Universal Product Code (UPC): current UPCs are listed on our website
Begin your journey towards the difference nutrition can make not only in your practice, but also in the lives of your patients. Standard Process is excited to offer complimentary online continuing education (CE) courses for veterinarians and technicians! The courses are taught by veterinarians who are experts in nutrition and practice management. Our courses are nationally accredited by the RACE program of the American Association of Veterinary State Boards (AAVSB), providing an excellent way to help meet your CE requirements. Simply register, log in and search for the course name.

**Designed to Help You Succeed**

**Each one-hour course features:**

- Self-paced, learner-centered format with easy navigation
- Mobile-friendly design for on-the-go accessibility
- Printable or downloadable CE certificate immediately available upon successful completion

**Choose from these great flexible courses:**  
(worth one credit each)

- Getting at the Gut Fundamentals
- Implementing Nutrition Strategies with Rehab Patients
- Integrating Functional Nutrition Into Your Practice
- Addressing Homeostasis and Its Role in Healing Mechanisms
- Why Nutrition is Important to Supporting Good Health
- Understanding the Use of Hemp Oil in Veterinary Medicine

Achieving Holistic Health Through Nutrition

The key to pets’ optimal health is a diet rich in a variety of complex nutrients. The ingredient combinations in Standard Process Veterinary Formulas™ provide a spectrum of nutrients to support multiple organs and systems in the body.

Complex formulas of targeted nutrients are derived from whole food ingredients, whole food concentrates and isolates, organ and glandular tissue, specialized protein extracts, botanicals and synthetic ingredients.

The **great majority** of the raw plant ingredients used in our products are grown on our **organic and sustainable farm**.
Being a veterinarian isn't a job. It's a calling.
It's not something you do. It's who you are.

For more than 90 years, Standard Process has helped families along the path to optimal health. It's not something we do. It's who we are.

Thank you for helping us change lives.
