VF Hemp Oil and Canine Hemp Oil Complex™

Endocannabinoid system support designed for pets

## Why Choose Standard Process Hemp Supplements?

### Grown on our Organic Farm

Our hemp is proudly grown on our certified organic farm, which helps preserve its exceptional quality from seed to supplement. Our hemp comes from organic, non-GMO strains. The base hemp oil ingredient boasts a diverse array of phytocannabinoids and terpenoids.

### Exceptionally Clean Production Techniques

Our Supercritical Fluid Extraction process provides a full-spectrum extract by utilizing carbon dioxide (CO2) instead of harsh solvents or chemical converting procedures. We also use the whole plant from the ground up (aerial parts), which helps us significantly reduce waste.

### Strict Quality Standards

Each batch of hemp oil is independently tested to ensure it lives up to our high expectations. The result is an ingredient that is pure, potent, and certified organic.

## What is the Endocannabinoid System?

For pets and people alike, the endocannabinoid system (ECS) is perhaps the most important physiological system involved in establishing and maintaining optimal health as this ubiquitous system mediates a homeostatic balance of the nervous and immune systems in conjunction with other organ systems.<sup>1-4</sup> The physiological effects of cannabinoids and their respective cannabinoid receptors are common among all mammals<sup>5</sup> — a well-balanced ECS is associated with favorable health outcomes, while imbalance is often associated with a variety of health challenges.<sup>3</sup>
